

Sureshot Pattern 1

Requirements:

1. Market trending hona chahiye.
 2. Trade ke aas-paas koi strong ya minor SNR nahi hona chahiye.
 3. Trade candle ki last candle ka head tail se bada hona chahiye.
 4. Market mein ek clear reference point hona chahiye.
 5. Last trade candle abnormal (bahut badi) nahi honi chahiye.
-

Logic:

1. Trending market mein hum trend ke sath chal rahe hain, jo success ke chances badhata hai.
 2. Agar candle ka head tail se bada ho, toh ye market ki strong momentum ko dikhata hai aur trend continuation ke chances badhate hain.
 3. Trend follow karte waqt hum candlestick psychology aur levels pe bhi dhyan dete hain, jo humari accuracy ko aur improve karta hai.
-

Precautions:

1. Koi candle hammer pattern ki tarah nahi honi chahiye.
 2. Reference point na ho toh trade mat kijiye, kyunki piche strong SNR hone ka pata nahi chalega.
 3. Jitni achhi tarah se aap requirements follow karenge, trade ki accuracy utni hi zyada hogi.
 4. Koi candle agar abnormal size ki lagti ho, toh us trade ko avoid kijiye.
-

Sureshot Pattern 2

Requirements:

1. **Red-green-red-green ka pattern** minimum **4 candles** ka hona chahiye.
2. Pattern ki ginti hamesha **opposite color se start** hogi.
3. Pattern **trend ke opposite direction me break** hona chahiye.
 - **Example:**
 - **Upward trend** me pattern **red ke baad red** se break karega.
 - **Downward trend** me pattern **green ke baad green** se break karega.

Precautions:

1. Pattern todne wali candle **hammer nahi honi chahiye**.
2. Trade **sirf tab lena hai jab pattern trend ke opposite direction me break kare**.
3. Candle **abnormal size** ki nahi honi chahiye.

Logic

- Yeh pattern tab banta hai jab market me **buyers aur sellers ki power barabar ho**.
- Jab yeh pattern break karta hai (e.g., **green ke baad green**), iska matlab hai ki market ki momentum shift ho rahi hai.
 - For example:
 - Agar **sellers ki power zyada ho**, toh **agli candle red** banegi.
- Isliye hamesha **trend ke saath hi trade** karna hai:
 - **Upward trend** me **red ke baad red** banne par **up trade** place karna hai.

Sureshot Pattern 3

Requirements:

1. **Support resistance** mein badalna chahiye ya **resistance support** mein badalna chahiye, bas level strong hona chahiye.
2. Trade ki **second last candle SNR zone** ke bahar puri tarah banni chahiye (jaise image mein dikhaya gaya hai).
3. Next candle ko **level ka respect karte hue andar close** hona chahiye.
4. Agar candle level ka respect karke chhoti wick banaye aur level ke bahar close kare, to hum **reversal trade lenge** (jaise image mein dikhaya gaya hai).

Precautions:

1. Trade candle ki **third last candle SNR ka 50% se zyada break** nahi karni chahiye.
2. Trade candle ki **last candle ki wick level ke bahar jyada** nahi honi chahiye.
3. Trade candle ki **last candle doji** nahi honi chahiye.
4. Koi bhi candle **abnormal** nahi honi chahiye.
5. Level **strong** hona chahiye; weak level par trade lene se loss ho sakta hai.

Logic:

Yeh concept specially trend ke sath trade lene ke liye banaya gaya hai, jisme **support resistance ban raha hai ya resistance support ban raha hai**.

Yeh strategy **reversal trading** aur **SNR levels** ka dhyan rakhte hue banayi gayi hai. Isse hum **breakout ya breakdown trading** bhi bol sakte hain.

Sureshot Pattern 4

Requirements:

1. Market ranging hona chahiye.
2. Trade ki last second candle level par touch honi chahiye.
3. Trade ki last candle, last second candle ki wick ke andar + level par jo gap hai usko fulfil karte hue close hona chahiye. (As per Card no. 4)
4. Level strong hona chahiye. Horizontal aur trend level dono ho sakte hai.

Precautions:

1. Trade ki Last second candle ki wick level se jyada bahar nahi jani chahiye.
2. Trade ki last candle, trade ke last second candle ke wick ke andar hi close honi chahiye.
3. Stuck market nahi honi chahiye.

Logic:

Trade candle ki last second candle jo level touch karke big wick bana kar close hui hai wo hame reversal ka sign de rahi hai.

Uske baad wali candle jo trade candle ki last candle hai jo wick ke andar close hui hai wo hame show kar rahi hai ki jo gap thi level mai usse full fill kar diya gaya hai.

Ab Trade candle ki last second candle jisne badi wick banai hai uss wick ko bhi full fill kar diya hai to ab market mai ek reversal candle jrur ayegi.

Sureshot Pattern 5

Requirements:

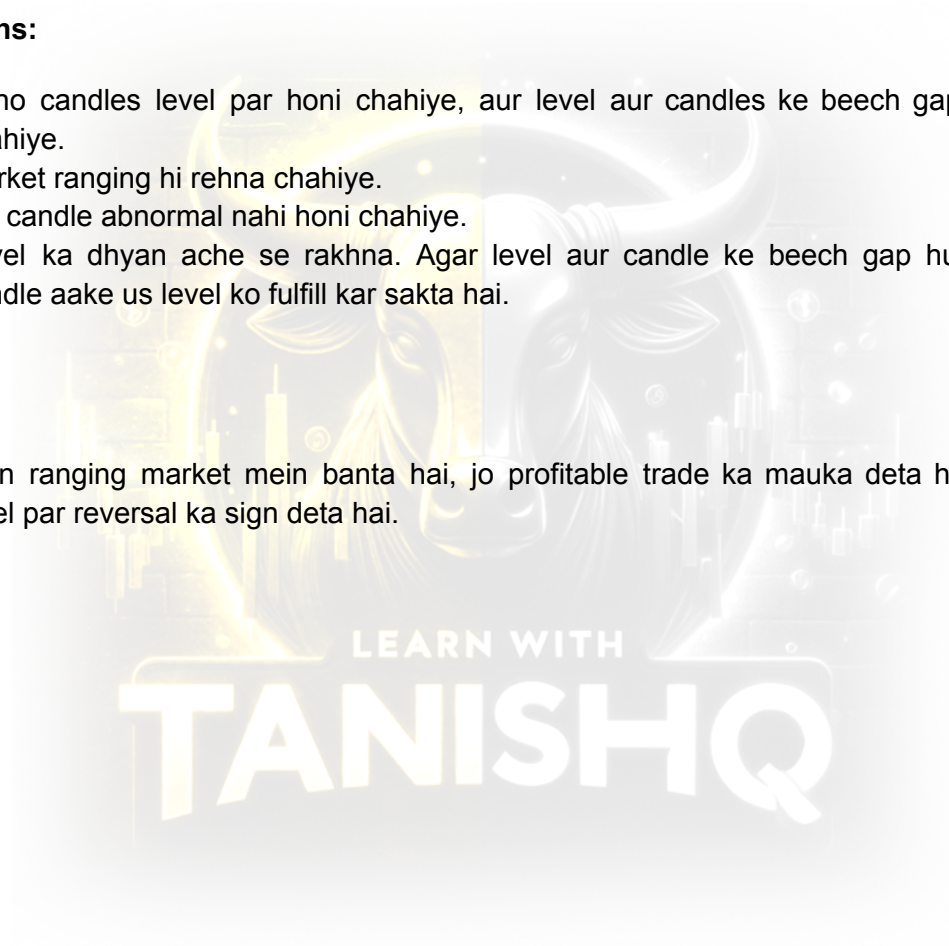

1. Market ranging hona chahiye, ya toh horizontal line ke beech ya trend lines ke beech.
2. Pehli candle hammer honi chahiye aur doosri candle inverted hammer honi chahiye.
3. Dono candles ka color koi bhi ho sakta hai (red/green chalega).

Precautions:

1. Dono candles level par honi chahiye, aur level aur candles ke beech gap nahi hona chahiye.
2. Market ranging hi rehna chahiye.
3. Koi candle abnormal nahi honi chahiye.
4. Level ka dhyan ache se rakhna. Agar level aur candle ke beech gap hua, toh agla candle aake us level ko fulfill kar sakta hai.

Logic:

Yeh pattern ranging market mein banta hai, jo profitable trade ka mauka deta hai. Hammer candle level par reversal ka sign deta hai.

Sureshot Pattern 6

Requirements:

1. Market ek **continuous trend** mein hona chahiye, aur usme **6-8 candles** ek direction mein bani honi chahiye.
Example: Agar market downtrend mein hai aur 7 red candles bani hain, aur phir ekdum se ek badi green candle ban jaye.
2. Jo **big candle** banegi, usme **shadow bahut kam** hona chahiye aur wo candle **previous 3-4 candles ko lagbhag cover** kar leni chahiye.
3. Waha par koi **important level** hona chahiye. Agar level waha nahi hai, to aas paas bhi nahi hona chahiye.
Warna trade waha jaake **level ko touch kar sakti hai**, jisse hame loss ho sakta hai.
4. Agar level hai to reversal hone ki surety **zyada badh jati hai**.

Precautions:

1. **Big candle** mein zyada **wick nahi** honi chahiye.
2. Jahaan candle bani hai, uske aas paas **koi level nahi** hona chahiye, warna kuch candles level ko jaake touch karenge.
3. **Trend ka dhyan** rakhna zaroori hai, kyunki trade hamesha **trend ke sath hi lena hai**.

Logic:

Yeh pattern market mein ekdum se **opposite pressure** ko show karta hai.

Big candle yeh dikhata hai ki **opposite pressure khatam ho raha hai**. Agar uss jagah koi **level** hai, to reversal ke chances **aur zyada badh jate hain**.
